

Week beg: 27.04.2020 Alternative/additional home learning ideas

Can you make your favourite sandwich? Then either verbally describe how you made it or write or draw a set of instructions. Use time connectives such as: First, Next, Then, After that...

Can you write a list of all the fun things that you have been up to since school closed? This can include how many yummy Easter eggs you have eaten. Try and use bullet points when writing your list.

Create a weather diary/booklet and track the weather each day, draw a picture of what the weather is like that day and write a simple sentences such as ' It is sunny'. Can you find out what the temperature is that day by looking at the weather forecast or a weather app?

Make/get a cake, pizza or any of your favourite food. Can you cut it in half to create two equal sides? Try this with lots of things such as, fruit, bread, chocolate, playdough etc to see if you can find a half of an object.

Practise counting objects in 2s. Then try and put this learning into learning/practising the two times tables by saying or writing
 $1 \times 2 = 2$
 $2 \times 2 = 4$ (etc)

Get a plate or tray and draw/create a divider down the middle. Then get a certain amount of objects and see if you can share them equally between the two halves.

Remember the 2 times table is just doubling really.

Can you draw, create or paint a beautiful picture to put in your window to make people walking or driving past smile?

Can you make an egg bounce?
 Have a go at this science experiment to see if you can..
