

Dear Cornflowers

I hope you are all well. Some of you who did the fraction maths activity I set on purple Mash struggled with a bit. I apologise because it was a bit ahead of where we are up to, and I put it up without having a good look at it as I wanted to practise posting tasks on there.

SO! I have made a PowerPoint which I hope will make things a bit clearer. Ordering fractions is really all about finding **equivalent** fractions, which we have done together in class and it's important for when we come to add and subtract fractions.

You don't need to write anything down, just work through the slides. There is quite a lot on there, so please don't feel you have to do it all at once, and if you get flummoxed don't worry either, just go as far as you can with it.

I hope you managed to have a look at the maths challenges too, I will put some up soon.

There is a reading task on Easter on our class page I hope you will find out a few things you didn't know. (Can you believe it is Easter already?)

Keep checking the website as I will keep posting things on there.

I hope you have a lovely Easter.

Mr Doyle
