

Friday 24th April

Today we are going to learn about the body.

There is a short PowerPoint for you to look at explaining different parts of the body.

Can you point to and name parts of your body? Where do you think your heart is?

Activity

Draw an outline of your body and label different parts. Remember to include parts you cannot see such as your heart, brain and lungs.

Or if you have a printer at home and would prefer, you can use the label parts of the body activity sheet.

Or on Purple Mash there is a 'label the body' activity. It has been set as a 2do!
