

Hello again my super Year 3s,

I don't know about you but the weeks are just flying by for me at the minute! I can't believe it's time to set you some more work.

I would first of all like to say a massive THANK YOU to all of you who have emailed me. It really honestly did lift my mood hearing from so many of you and seeing all the wonderful things you've been up to! Please keep them coming; you can email me any time at alovera@st-james.derbyshire.sch.uk and I will be sure to get back to you.

Lots of you who emailed me were asking about my new house. I know I promised to show you a picture so here is a before and after:

What do you think? It's getting there but still lots to do!

I hope you've all been getting creative! I've been working on a paint by number canvas that my friend sent to me in the post. It's going to take me a while but I am going to persevere with it. I will show you all when it's done.

Here are some tasks for you to try this week:

- Maths - Now you know a bit more about measurements, this week I would like you to have a go at adding and subtracting lengths. You can use the sheets below or create your own by adding and subtracting measurements of objects in your house.
- Topic - Have some fun with skeletons! See the sheet below for some ideas.
- Art / DT - It's birds nesting season at the moment. Why not help them out and put some birdfeeders out for them using milk cartons? You can decorate the carton first then fill it with treats for the little birds! Here's an example.

One thing I would like you to think about is independence. This is something we have already spoken a lot about and it's a key quality I expect children in Year 3 to develop. Although your parents are there to help, try not to be too dependent on them and work things out for yourselves. Remember, lots of parents have their own work to do from home.

Take care my loves, Miss Graham x
