

## Crocodiles and Alligators

Watch video and documentary footage of crocodiles and alligators. Make notes to remember and record important facts and snippets of information. Share your notes with your family and chat about the video footage together. Discuss and describe your own feelings and opinions about the creatures whilst giving valid reasons for your feelings. Are these animals misunderstood?

**Note:** There are plenty of online clips and film footage of crocodiles and alligators. The National Geographic website has good examples which highlight some of the conservation issues around these creatures. Observe the animals hunting and killing their prey.
