

What will you choose to do?

- Talk to members of your family to find out what has changed since they were 10 years old. What things have changed and what has stayed the same? Is the world a better place now?
- Take a look at some old family photographs. Create a timeline for your family showing important events such as births, marriages or house moves.
- Research some scientific arguments about time travel. Do you think it will ever be possible?
- Take digital photographs of as many different types of watches as you can find and create a montage. Design a watch of your own using your collected images as inspiration. You could incorporate some exciting new functions!
- If you could travel to any time period, anywhere in the world, where would you go? Make a scrapbook of your chosen period and explain what you would do while you were there.
- Write an autobiography of your life so far.
- Time yourself doing different activities at home. Create a pie chart to show the proportion of time each day you spend eating, sleeping, or at school. Are there any activities you would like to do more or less? What would the pie chart of your perfect day look like?
- Find out about some of the most important technological inventions of the last century, such as mobile phones, GPS, microwave ovens, MRI scans, video games and the World Wide Web. Can you imagine life without them now? Conduct a survey to find out which aspect of technology your family and friends would miss if they had to do without it.
- Draw and label a design for a product of the future. What would it do? How would it make life easier?
- What is your earliest memory? Video yourself talking about it or write it down as a class blog post. Compare your earliest memory with those of your classmates.
- Create portraits of members of your family. Will you draw, paint, take photographs or use computer software?
