

Monday 22nd June

Today we are going to be learning about British birds and birds that you might find in your garden.

See British birds ppt

Choose your favourite bird and do a little more research either online, looking in books or you could even phone a family member if you know they like birds.

Use the information you have gathered to write a fact file.

Remember to include

What they like to eat, where they live and what they have/look like. Don't forget to illustrate your fact file.

What birds can you find in your garden?

Use the chart provided or you can make your own and keep count of what birds you find in your garden. If you are unsure of what bird it is, the website below will help you to identify it. Good luck and have fun!
