

Tuesday 30th June

Today we would like you to find out about animals that live in your chosen country.

What animals are native to your country and why do you think this is? Is it because of the climate or habitats?

Are there any endangered animals that live in your country? Can you find out why they have become endangered and is anything being done to protect them?

Choose one animal, write some key facts and draw a picture. Add this to your lapbook.
