

Northern Hemisphere Constellation Spotting Checklist

How many of these stunning constellations can you spot in the night sky? You may need to use a star chart in combination with this checklist.

Warning: These constellations will all be visible in the sky above the Northern Hemisphere at some point in the year but only a few will be visible for the entire year. You will need patience and an extended period of time to complete your checklist.

Cassiopeia  <input type="checkbox"/>	Canis Major  <input type="checkbox"/>	Ursa Major  <input type="checkbox"/>
Cancer  <input type="checkbox"/>	Gemini  <input type="checkbox"/>	Leo  <input type="checkbox"/>
Taurus  <input type="checkbox"/>	Pisces  <input type="checkbox"/>	Virgo  <input type="checkbox"/>
Lyra  <input type="checkbox"/>	Scorpio  <input type="checkbox"/>	Cygnus  <input type="checkbox"/>
